Fmilien Breton

PROJECTS

Atto-8 Microcomputer

A MINIMALIST 8-BIT MICROCOMPUTER WITH STACK-BASED MICROPROCESSOR Rust · C · Assembly

- · Designed ecosystem of hardware and software from logic gates upward, including instruction set architecture, from-scratch assembler and cross-platform emulator, totaling over 20 000 SLOC and 750 hours of work.
- Wrote various demos in Assembly running natively on microcomputer memory monitor sprite editor • Tetris clone • native assembler • postfix notation calculator.
- Built microcomputer in hardware using discrete 74HC-series logic chips on breadboards.

Atto-8 C Compiler

A RUDIMENTARY C99 COMPILER FOR THE ATTO-8 MICROARCHITECTURE

Rust · C · Assembly

- · Building C99 compiler from sctatch in Rust targeting Atto-8 Assembly language, consisting of preprocessor, parser, typechecker, optimizer and code generator.
- · Implemented dead code elimination, constant folding and strength reduction resulting in average of 20% increase in execution speed and 10% reduction in binary size.
- · Developed extensive C standard library, including heap allocator supporting malloc and free, string handling functions such as strlen and memcpy and input/output routines including printf supporting conversion specifiers %d, %u, %x, %c, %s and %p.

LTRE Regex Engine

A FAST REGULAR EXPRESSION LIBRARY WRITTEN IN C99

automata to match input strings in linear time without backtracking.

- · Built regex engine in C99 which compiles regular expressions down to deterministic finite
- · Wrote extensive test suite of over 100 tests to ensure end-to-end correctness of engine.
- Developed grep-like tool supporting flags -v, -x, -i, -n and -c as real-world stress test for engine.

DBLess Password Manager

A HASH-BASED, DATABASE-LESS PASSWORD MANAGER

C • Python

- Devised custom hash procedure based on SHA-256 in Python which deterministically generates passwords on demand without requiring encryption or password storage.
- Reimplemented password generation algorithm in C along with SHA-256 routines as per FIPS PUB 180-4 for use as interactive CLI tool.

VOLUNTEERING

Hack the Hill Hackathon

DEVELOPMENT MANAGER — DEVELOPMENT TEAM

Ottawa | November 2022 - Present

- · Leading development of open-source participant tracker built with Next.js and Prisma, used by over 1000 hackers and 50 organizers throughout hackathon.
- · Built and maintained internal sporsorship payment portal powered by Stripe and React is in collaboration with sponsorship team, enabling processing of over 20 000\$.

uOttawa Computer Science Club

CLUB EXECUTIVE

University of Ottawa | June 2022 - Present

- Building community of over 1000 computer science students at the University of Ottawa.
- · Collaborated with executive board to brainstorm, organize and schedule a dozen events by designing marketing material with Figma and hosting workshops for over 100 students.

EXPERIENCE

Zeptile Software

SOFTWARE ENGINEER - WEB3

Remote | October 2022 - October 2023

· Implemented various smart contracts in Solidity as per specification and ensured 100% test coverage through Chai and Hardhat.

EDUCATION

University of Ottawa

BSC WITH HONOURS IN COMPUTER SCIENCE

• Admission scholarship — 95%+ average.

September 2021 — Present November 2020

SKILLS

Languages

Rust • C • Python • JavaScript

Development Tools

NixOS • Neovim • Fish Shell • Git

Other Technologies

React · Node.js · HTML · CSS · JSON · YAML · Markdown • LaTeX • Lua • x86 Assembly • C++ · Bash · GDB · Linux · Arduino · VS Code • Figma • Notion • Docker · Cloudflare · GitHub

Spoken Languages

- French Native
- Fnalish Native
- · Spanish Intermediate
- Russian Elementary

Other Interests

Electronics · Robotics · CAD • 3D Printing • Finance • Mathematics • Drone Building · Music · Bouldering
